Overview

NEW CONCEPT

New Concept Co., Ltd. was established in 1993 with a purpose of International business activities. At the beginning our major business was dispatching Chinese computer software engineers to customers. In according to our business expansion we increased to employ Japanese engineers and develop our original computer software. Both of Chinese and Japanese engineers are using their good skills in their own fields, however, they are developing new software in union. We also have a big group of engineers in China we can fill up a vacancy immediately. In deed a large number of Chinese excellent engineers are working for our group companies in Shanghai now. We maintain our original development systems with high technology.

Overview

NEW CONCEPT

Medical Systems Dept.

We construct medical information systems following to the IT generation with a certain knowledge and technology based on long years of experiences and achievement. We have been developing original package software, clinical laboratory examination system, health care examination system, blood transfusion system and so on, in the medical field since 2001. Our general providing system of hardware and software including consultation, design, development, installation, application guidance and maintenance is valued highly.
